Subject: Lower Duwamish Sediment Project, 2000 Contract  
Progress Report for November 25, 2006 – December 29, 2006

Dear Jennie:

This progress report and the associated Invoice No. 77-3125 cover work on Slip 4 performed by Integral Consulting and its subcontractors November 25, 2006 – December 29, 2006 under the Duwamish Waterway Sediment Investigation contract. The following work is covered by this invoice:

- Task 14C (Biological Assessment) – Integral staff began preparation of the final BA.
- Task 14E (Slip 4 60% Design): Charges for previous plotter use in the Slip 4 60% design effort were logged to the accounting system. The 60% design effort is complete.
- Task 14F (Slip 4 100% Design): Integral staff continued efforts on the 100% design effort, including review of EPA comments, phone and email correspondence to revise comments, coordination with team subcontractors on technical analyses, and document revisions. An invoice was received from a CAD operator (Midpoint CAD) that supported the 100% design effort.
- Task 14J (Slip 4 Design - Project Management): Integral staff reviewed labor reports and participated in internal staff coordination for the design and BA efforts. Integral staff also attended a meeting with SCL and King County on November 30 to address design comments; a meeting with SCL and SPU on construction management issues on December 12; a meeting on December 13 with SCL and EPA to plan a DRCC outreach meeting; and teleconferences with EPA on December 20 to resolve comments.

Page 2

- Task 14K (Slip 4 Source Control): Integral staff began preparation of a memo documenting the status of source control in the Slip 4 basin, reviewed additional technical reports containing data for NBF, processed new data into the GTSP/NBF database, created GTSP/NBF data transmittal for D.M.D., Inc., supported City attorney requests for data summaries, and assigned sample points to individual drainage lines.

Also, please note that we identified that the billing rates for two employees (Ben Starr and Sarah Otten) had been reversed earlier this year. For each of the tasks that they billed to through the previous invoice period (i.e., through November 24, 2006) we have corrected the rate and included the appropriate cost adjustments. If additional supporting information is required, please let me know at your earliest convenience.

The specific charges to each contract task are provided in the attached Task Order Summary sheets. Please call if you have questions.

Sincerely,

Betsy Day  
Integral Consulting Inc.
